

If you want Connecticut to thrive, economically and intellectually, you will not cut funding for public libraries!!

Libraries offer the wider world of literacy, technology, and reading to the whole community, whether they are rich or poor. They help parents learn the importance of reading and enable them to help their children. They give young students and teens a quiet, safe place to read and work where there is help close at hand. They offer help and hope to people looking for employment. They are a source of information and enrichment for our older citizens.

Libraries embody the democratic ideal. They are not a partisan cause. They deserve your support!

Please vote AGAINST the elimination of funding for Connecticard, CLC, and Grants to Public Libraries!!
